

# ACCE Networking Luncheon

**- Small Business does not mean Small Security -**

Organized by:

Sponsored by:

In today's connected world every business is a potential target to cyber criminals. Every business collects and stores data which has a value to someone. Ransomware and Email Fraud are two of the most common cyber threats facing businesses. The impact they can have on a small and medium business can be disastrous if they are not prepared. Stewart Cawthray, Rogers General Manager of Enterprise Security, will provide an overview of these threats and provide suggestions for how any size business can prepare for them.

**Lucky Draw**

**Blackberry  
KEYone**
